

The **Cluster of Excellence “Balance of the Microverse”** of the Friedrich Schiller University Jena, Germany, combines expertise in life, material, optical and computational sciences to elevate microbiome studies from descriptive to hypothesis-driven and functional analyses. Our core mission is to elucidate fundamental principles of the interactions and functions in microbial communities in diverse habitats ranging from oceans and ground water to plant and human hosts. We aim to identify the shared characteristics of disturbed or polluted ecosystems as well as infectious diseases on the microbiome level, and develop strategies for their remediation by targeted interventions. Our full spectrum of expertise in the physical and life sciences will be leveraged to address these important issues in natural habitats as well as synthetic arenas in a collaborative manner. The affiliated early career program of the *Jena School for Microbial Communication (JSMC)* offers an ambitious, structured and interdisciplinary graduate training based on top-level fundamental research.

The Cluster of Excellence *Balance of the Microverse* invites applications for a  
**Postdoctoral Researcher Position (Microverse 05/2019)**  
to conduct research in the group of Dr. Maria Ermolaeva on the project

**High throughput analysis of whole organism effects of antibiotics-induced  
microbiome shifts in *Caenorhabditis elegans***

**We expect:**

- A PhD (or equivalent) in natural sciences (Microbiology, Molecular Biology, Biochemistry or closely related fields). Candidates in the final stages of obtaining their doctorate are eligible to apply
- Desirable methodological skills: excellent background in microbial biochemistry and microbiology, hands-on knowledge of analytical methods. Experience in anaerobic microbial cultures is advantageous but not required
- Highly motivated individuals with an interest in joining one of the interdisciplinary research areas of the Microverse Cluster
- The ability to work creatively and independently towards developing your own research project
- An integrative and cooperative personality with enthusiasm for actively participating in the dynamic Microverse community
- Excellent English communication skills, both written and spoken

**We offer:**

- A highly communicative atmosphere within a scientific network providing top-level research facilities
- A comprehensive mentoring program and soft skill courses for early career researchers
- *Jena – City of Science*: a young and lively town with a vibrant local cultural agenda

The two year full-time postdoctoral researcher position (100% TV-L E13) will be funded through the Excellence Strategy of the German federal and state governments. The Friedrich Schiller University Jena is an equal opportunity employer and part-time contracts can be discussed. Disabled persons with comparable qualifications will receive preferential status.

Applications are exclusively accepted via the JSMC Online Application Portal:

<https://apply.jsmc.uni-jena.de/>

Please familiarize yourself with the currently available postdoctoral projects ([www.microverse-cluster.de](http://www.microverse-cluster.de)) and the application process as described in the Online Application Portal. Selected applicants will be invited to a recruitment meeting in Jena on 10-11 April or 15-16 May 2019. Awarding decisions will be announced shortly thereafter, and candidates are expected to be available to start their projects in the first half of 2019.

**Application deadline: 20<sup>th</sup> March 2019**
